CULTURAL SUGGESTIONS FOR GARDENING

HOW TO PLANT B&B TREES

Trees are easily planted. Dig a hole six inches wider than the ball for the top shoulder of the ball to be level with the hole, and then start to spading the outside wall of the hole toward the tree 12 inches deep. Keep spading until the ground is broken to four feet on each side of the tree.

Press the dirt next to the ball. Bank the dirt six inches around the tree, in an inverted saucer shape, out 18 inches on each side of the tree. About three feet from the tree, make a

ridge eight inches high around tree. This basin will hold twenty to thirty gallons of water. In watering push the hose down beside the ball and let run until basin is filled. This will fill in the air spaces. After the water has soaked in, mulch with one bushel of stable manure. Leave the water basin and water when necessary.

CULTIVATION: All types of Planting Materials require systematic cultivation. After Shrubs have been planted and the beds are put in good condition by working and fertilizing, we recommend that the surface of the beds be stirred to a depth of two or three inches and maintain a mulch. A pronged fork is one of the best Garden Tools to use in breaking the crust which will form on the beds after each application of water or rain.

HOW TO WATER TREES AND SHRUBS: To water newly planted Trees and Shrubs, push the end of the

hose down beside the ball and let water run until the basin is full. This will fill all air spaces. Repeat every week if needed to keep soil moistened. Mulch with rough straw or lawn clippings mixed with stable manure.

HOW TO PLANT N-B TREES: All NB (Bare Root) Trees lose a part of their roots in transplanting. To offset the root loss, the branches should be pruned back half way or more as soon as planted. To plant NB Trees, Roses, etc. you will see a change of color on the trunks where the surface level should be. Fill in fine soil among the roots, placing the roots carefully in the position they should grow. Follow the same instructions as for Planting B&B Trees.

DRAINAGE: Have good surface drainage, and do not plant too deep. Don't dig hole any deeper than the ball because of settling.

FERTILIZING: Do NOT use any fertilizer in the hole when planting unless it is a small amount of bone meal for each plant. In most soils, renewed strength in the way of dairy manure for plant food should be applied at least once a year, usually during the winter. The application of well-rotted and pulverized dairy manure will make the beds more pliable and allow for cultivation of same more rapidly and readily after much rainfall. Commercial fertilizers are satisfactory to use in small quantities during the growing season.

PRUNING AND CARE OF SHRUBS

PRUNING: Most Evergreens, including Broadleaf and Coniferous types, as well as Fruit Trees and some Flowering Shrubs should be pruned during the dormant period. If you wish to retain the natural appearance of Shrubs, so they will not out-grow their positions, they should be reshaped by cutting off the long "shoots" inside the natural edge of the specimen, and not cut uniform to make formal plants of them. Some Flowering Shrubs, which bloom only early in the spring should be pruned after the blooming period to have blooms the following spring, as these types produce their blooms on the past season's growth.

SPRAYING: Certain Plant Materials require spraying for the most prevalent types of insects and fungus.

The most common enemies of the Coniferous Evergreens are Blight, Bag worms, and Red Spider.

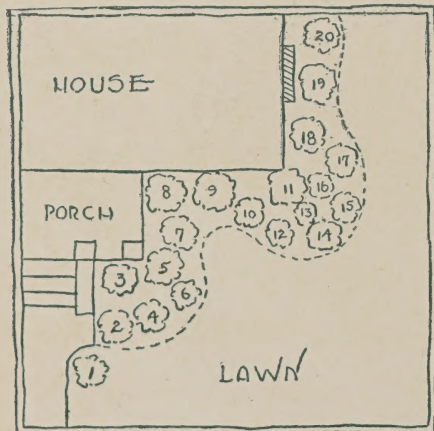

For all CHEWING OR FOLIAGE eating insects, a stomach poison must be applied to the foliage. Use ARSENATE OF LEAD.

For such insects as Red Spider, or any of the smaller ones which draw the sap from the foliage, SULPHUR should be applied.

For PLANT LICE AND APHIDS, nicotine sulphate should be applied.

For MILDEW OR FUNGUS DISEASE, such as Black-spot, leaf blights, etc., use Bordeaux Mixture.

For SCALE INSECTS and WHITE FLY, spray with lime sulphur if trees are dormant. For Summer spray or for Evergreens, use an oil EMULSION.

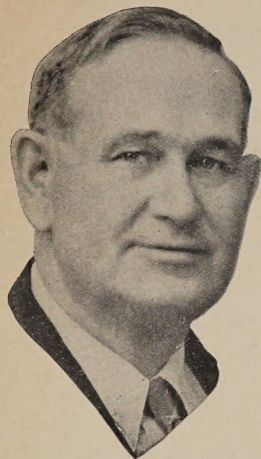

LAYING OUT SHRUB BEDS

Here is a sketch which might serve your purpose in Foundation Arrangement! It is intended to illustrate the proper spacing of Shrubbry in a group around the home, and once in place, how the beds should be outlined in a curve and the entire space between the shrubs spaded-up well and kept fertilized for neatness of the bed and healthy shrubs in the group.

An effective foundation planting may be accomplished with the following: 1. Pfitzer Juniper; 2. Semi-Dwarf Gardenia; 3. Sweet Viburnum; 4. Azalea Rose; 5. Sylvester Juniper; 6. Azalea Rose; 7. Formosa Azalea; 8. and 9. Griffing's compact Elaeagnus; 10. Formosa Azalea; 11. Silver Red Cedar; 12. Azalea Rose; 13. Formosa Azalea; 14. and 15. Dwarf Gardenia; 16. Formosa Azalea; 17. Dwarf Gardenia; 18. Pyramid Ligustrum; 19. Wilma Firethorn; 20. Podocarpus.

After the shrubs are planted in place, and carefully watered and settled, and the bed outlined, keep the area well cultivated for beautiful, healthy Evergreen Shrubs.

PERSONAL MESSAGE TO OUR FRIENDS!

THANK YOU FOR YOUR PATRONAGE IN THE PAST!

In presenting this new Catalog listing of our present supply of Trees, Shrubby, Fruit Trees, Palms, Roses, etc. I want to take this opportunity of expressing gratitude to our many customers over the United States for the business entrusted to us in the years gone by. It has been our pleasure to serve you in the best manner our experience has permitted; and as the years go on, we hope to continue handling your orders with the same confidence of giving you full values for your money. We personally thank each customer for the business given us, which enables us to carry on with our ever enlarging selections and higher quality trees and shrubs.

A FEATURE ABOUT GRIFFING'S B&B NURSERY STOCK YOU MUST NOT OVERLOOK

Our Great Success in transplanting Trees and Shrubs safely at all Seasons may be largely Attributed to our Wonderful Balling Soil. There is no Other Just Like It. We have the soil that is "just right" for Balling and Burlapping. The Ball is Cut out in one solid piece, often compared to Slicing a "piece of cheese."

HOW WE BALL

We do not Spade the Balls Out and tie burlap around the Loosened Soil nor do we Drive a Cylinder around to cut roots Too Short, but the Soil is Solid, never cracked and Size of Ball to conform to the Root System.

CAUTION

Never lift Trees and shrubs by the Top. Lift the Ball Itself by grasping it with both hands around the ball, or Larger Balls by making a Sling of Burlap, so as not to loosen Roots in the Ball.

ASSOCIATION MEMBERSHIP

To further the interest of the Nursery and Landscape Development and keep posted on affairs of interest to the Trade, we maintain membership in the following Trade Associations:
American Association of Nurserymen, Landscape Nurserymen's Association of the American Association of Nurserymen, Beaumont Florists & Nurserymen's Club, Beaumont Chamber of Commerce, Louisiana State Horticultural Association, Inc., Texas Association of Nurserymen, Texas State Florists' Association.

TERMS OF SALE

GUARANTEE

All Trees and Shrubs are GUARANTEED True to Name, full count, up to grade and in GOOD CONDITION when shipped. We will replace any plant, PROVING UNTRUE to name. Our Stock is of the HIGHEST QUALITY, thrifty, and WELL GROWN, insuring success if PROPERLY CARED for after transplanting in your Soil.

While we exercise ALL CARE to have all Stock true to Name, it is UNDERSTOOD THAT should ANY STOCK prove UNTRUE to name, Griffing Nurseries shall be liable only for the Purchase Price of the Stock which PROVES UNTRUE TO name and no GREATER AMOUNT.

PRICE

Throughout this Catalog are f. o. b. our NURSERIES, and do not include ANY COSTS for services, Delivery or Insurance. This Catalog CANCELS ALL PREVIOUS PRICES; all prices ARE SUBJECT TO CHANGE WITHOUT NOTICE.

TERMS

CASH WITH ORDER unless credit has BEEN ESTABLISHED. Where credit is established, WE ALLOW 2% FOR PAYMENT IN TEN (10) DAYS, or thirty (30) days NET. ALL ACCOUNTS ARE PAYABLE AT Beaumont, Texas. Cash with order or before shipment of goods UNLESS Terms are arranged PRIOR TO SHIPMENT.

RESERVE ORDERS

Orders booked IN ADVANCE of delivery date must be accompanied by 25% of the order TO INSURE US in reserving the goods for later delivery. No C. O. D. Orders WILL BE ACCEPTED UNLESS CREDIT RATING HAS BEEN ESTABLISHED, or 25% ACCOMPANIES THE ORDER.

INSURANCE ON TREES AND SHRUBS

We do not guarantee the life of any plant purchased, as we have no control over after-treatment or weather conditions, and we will not replace stock without charge. On request, we insure stock planted by us for a specified period at a rate covering the estimated hazard. Such insurance, however, is void unless account is paid in full within 30 days from date of invoice, except when special arrangements are agreed to by us in writing.

OUR GRADING SYSTEM

The Standardized System of Grading Nursery Stock as adopted by the American Association of Nurserymen is followed closely.

Illustrating Standardized Grading. All plants are the same height, but certainly there is a great difference in the general appearance and value. This is the only fair way of Grading Shrubs.

XX (Priced in first column) is well developed, standard merchantable stock, but not the best of the Species.

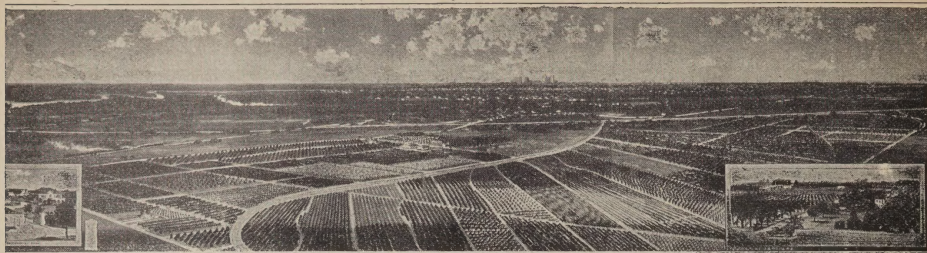

XXX (Priced in second column) is Heavy Specimens, well developed Stock.

EXTRA SPECIMENS: (Better Quality than XXX) is a Quality in which we specialize, which is above anything listed, and is often required by exacting Customers.

SPECIMEN NURSERY STOCK: For Specimen Stock above XX and XXX Quality, selected or marked in the Nurseries, will be priced according to its value.

USE GRIFFING'S STANDARDIZED GRADED TREES

A NURSERY WITH A BACKGROUND

Panorama View of Our 200 Acre Nursery

Over fifty years have passed since the present Griffing Organizations had their first inception in a small nursery in Northern Florida on land owned by the late D. C. Griffing, and managed by his five sons under the name of "Griffing Brothers."

Always the Griffings grew the stock they sold, offered the best of everything, experimented in every locality to find the most adaptable varieties, dug their Trees with care, packed under rigid inspection, and in all their activities gathered and disseminated information for the benefit of their patrons.

EXPERTS IN OUR LINE

The growing of Nursery Stock is a HIGHLY SPECIALIZED BUSINESS requiring an exact knowledge of Plants and HORTICULTURAL and scientific methods. After over FIFTY YEARS of successful growing we can without boasting, claim to be EXPERTS in our line. Our standards are of the highest.

Our field work is under the SUPERVISION of experienced Foremen, and they give our customers the benefit of their EXPERT KNOWLEDGE of how to GROW, DIG AND SHIP our Nursery Stock.

EXPERIENCE COUNTS

Our plants are the finest that can be produced. OUR EXPERIENCE enables us to offer you a VALUABLE and practical SERVICE in SELECTING, Planting, and caring for plants. We can and we are certain, from the EXPERIENCE OF YEARS, that you will find it pleasant and profitable to deal with us.

LANDSCAPE GARDENING

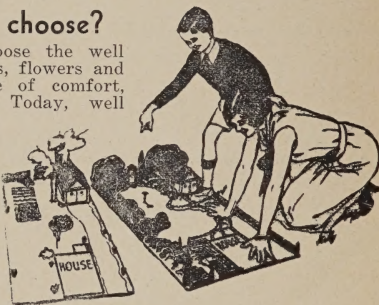

GET JOY OUT OF LANDSCAPE GARDENING

One of the greatest joys of Gardening is in the planting of something new and watching it from day to day as it unfolds new beauty. It is true that certain features of your garden are permanent. Your Shade Trees, for instance, provide background for the setting, and frame the picture of your Home. Other features of the Garden may be changed from year to year to create new interest and continue to be a source of joy to the planter.

WHICH would you choose?

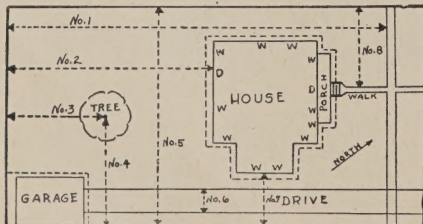

Of course you would choose the well planted place! Trees, shrubs, flowers and vines create an atmosphere of comfort, happiness and prosperity. Today, well planted grounds are the fashion.

Make your grounds more beautiful this year. A new tree or two, or possibly a few shrubs, plants and vines will add new beauty and interest. Come to us for help and advice with your spring planting.

SMALL HOME GROUNDS

For the average city lot, if you will SEND US the information as indicated on the SKETCH BELOW, showing the size of the grounds, location of drives, walks, permanent building, TREES already on THE PROPERTY, etc., it will enable us to furnish you with a DETAILED PLAN, together with an ITEMIZED LIST of the plants NEEDED, and an estimate of THE COST of the plant material. All are mailed for YOUR APPROVAL.

THE SERVICE COSTS NOTHING

When you send THE SKETCH, with the information needed, also send us \$10.00 for a lot not larger than 75 by 100 feet. As soon as YOUR ORDER FOR the material on the PLANTING LIST totals \$40.00 within ONE YEAR after the date of OUR ESTIMATE, the

original \$10.00 payment will be placed TO YOUR CREDIT, or if a larger PLAN is DESIRED, 20% of the amount WILL BE CREDITED FOR the purchase of plants. The cost for larger grounds is SLIGHTLY MORE in proportion TO THE SIZE of the development, and will be AGREED UPON when a preliminary SURVEY is made.

THE IMPORTANCE OF LANDSCAPE

The aim of Landscape Design is to produce the MAXIMUM OF BEAUTY consistent with utility. To attain THIS RESULT, it is usually best to secure THE SERVICES of a Landscape Architect, whose assistance will not only serve TO AVOID ERRORS but will also save EXPENSE AND TIME.

LANDSCAPE PLANTING

A WELL-LANDSCAPED dwelling gives out a perpetual smile. Winter and summer alike—to its owner's family, and every passing stranger—it radiates quiet, JOY, refinement.

IT NEED NOT BE a large elaborate dwelling: A cottage, even more than a castle, needs A BECOMING SETTING. Neither is much room needed. On the contrary, never is the Landscape Architect's touch more wonderful—or needed—than in making the utmost of A NARROW OR SHALLOW LOT.

LANDSCAPING AN INVESTMENT

We have YET TO MEET the owner who ever regretted an INVESTMENT—where he had UNDERTAKEN this improvement under competent advice and DEALT DIRECT with reliable, established Growers. Even one great towering Shade Tree—what a restful DELIGHT IT IS! Worth hundreds of dollars. Yet not impossible to purchase by simply PLANNING FOR IT.

USE GRIFFING'S STANDARDIZED GRADED TREES

BROADLEAF EVERGREENS

Modern Home-Plantings cannot be considered as complete—or hardly begun—if they do not contain a liberal supply of Broadleaf Evergreens. They are needed for the green foliage which gives color all the year, especially in winter when warmth and color are demanded. There is need for them in all plantings, particularly in the Outdoor Living Room where they lay claim in everyday beauty.

We have an unusually large collection of Broadleaf Evergreens. The plants are frequently transplanted, carefully pruned, and given plenty of space to develop into stately, vigorous and healthy specimens.

ABELIA

GLOSSY

A. Grandiflora

Small glossy evergreen leaves, with pinkish-white flowers in Spring and Summer. Hardy, thrifty growers.			
Class	Min. Ht.	XX	XXX
B&B	2 ft.	\$1.40	\$1.90
B&B	3 ft.	1.80	2.30
B&B	4 ft.	2.30	2.80

ASPIDISTRA

Aspidistra elatior

Dark rich green leaves, ornamental in Containers or in shady places out of doors.

Class	Min. Ht.	XX	XXX
5-in. Pot	18 in.	\$1.25	\$1.60
6-in. Pot	20 in.	1.50	2.00

AZALEA

Azaleas which were used sparingly in Landscape plantings over a period of years, in the Southwest have come into prominent place in all types of plantings. With their Evergreen foliage, and gorgeous blooms in the early Spring Season, no planting is considered complete without them.

All Azaleas require an acid soil, hence leaf-moss or Peat moss for mulching the roots should be added over the surface of the plant beds Lime and alkali conditions of soil require special preparation with new acid soil.

There are no more beautiful Flowering Shrubs than the Azaleas for the Gulf Coast area.

Massive group of Formosa Azaleas in full bloom.

OMURASAKI

A. indica omuraski

(Indica). Strong growing type, with rose-lavender flowers. Hardy. Blooms in midseason.

Class	Min. Sprd.	XX	XXX
B&B	24 in.	\$3.40	\$4.60
B&B	30 in.	4.60	5.90
B&B	3 ft.	5.90	7.60

PRESIDENT CLAY

A. indica pres. clay

(Indica). Tall growing, open grower, quite free growing. Medium size salmon flowers. Early type and quite hardy.

Class	Min. Ht.	XX	XXX
B&B	12 in.	\$1.20	\$1.50
B&B	15 in.	1.50	1.80
B&B	18 in.	1.80	2.20
B&B	24 in.	2.20	3.40
B&B	36 in.	3.40	4.60

Avenue of Azaleas
A gorgeous sight in full bloom.

AZALEA

FORMOSA

A. indica formosana

We recommend and grow principally the well-known, hardy indica formosa, which thrives in the open. Blooms heavy, rich Rose-Pink flowers in gorgeous array.

Class	Min. Sprd.	XX	XXX
B&B	12 in.	\$1.20	\$1.70
B&B	15 in.	1.50	1.90
B&B	18 in.	1.80	2.20
B&B	24 in.	2.20	2.80
B&B	30 in.	2.80	3.20
B&B	36 in.	3.40	3.90
B&B	42 in.	4.60	5.60
B&B	4 ft.	5.90	7.60
B&B	5 ft.	8.00	10.00

BRICK-DUST

A. indica brick-dust

(Indica). A low-headed bush and very compact grower. Flowers medium size to large, light orange-red color. Leaves rather narrow. A late blooming variety.

Class	Min. Sprd.	XX	XXX
B&B	18 in.	\$2.80	\$3.40
B&B	24 in.	3.40	4.60
B&B	30 in.	4.60	5.90
B&B	36 in.	5.90	7.60

DIXIE

A. indica dixie

(Indica). Blooms in midseason. A strong growing, hardy, bushy type. Salmon flowers with lavender splotch.

Class	Min. Sprd.	XX	XXX
B&B	12 in.	\$1.50	\$1.80
B&B	15 in.	1.80	2.20
B&B	18 in.	2.20	2.80
B&B	24 in.	2.80	3.20

BARBERRY

REDLEAF BARBERRY *B. thunbergi atropurpurea*

Dwarf growing, rich red foliage in Winter season.

Class	Min. Ht.	XX	XXX
B&B	15 in.	\$1.20	\$1.50
B&B	18 in.	1.50	2.00
B&B	2 ft.	2.30	3.00

UPRIGHT HARDY BARBERRY *Barberis pyramidalis*

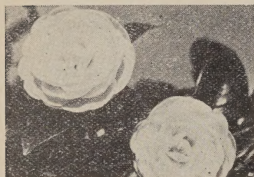

A rich dark green foliage, pyramidal habit, proving a most successful shrub of new selection.

Class	Min. Ht.	XX	XXX
B&B	18 in.	\$.75	\$1.10
B&B	2 ft.	1.10	2.00
B&B	3 ft.	2.00	2.80

CAMELLIA

JAPONICA

Camellias are sometimes called the "Aristocrats of Southern Gardens." They are easily grown in the South, and their rich, glossy foliage and colorful flowers make them unusually attractive. There are many named varieties, but not all are desirable. The flowers are produced during the mid-winter when no other flowers are found in the garden, bringing increased admiration for this plant.

Purity Camellia

Prof. Sargent Camellia

BON-AMI

C. jap bon-ami

Medium size flower, semi-double with almost white flowers, red variegations. Blooms heavy and in midseason.

Class	Min. Ht.	XX	XXX
B&B	2 ft.	\$ 9.50	\$12.50
B&B	3 ft.	15.00	18.00
B&B	4 ft.	19.80	24.90

CHANDLERI ELEGANS

C. jap. chandleri elegans

Flowers are double, very large, and of a cherry-red to rose pink spotted with white. Center petals interspersed with yellow stamens.

Class	Min. Ht.	XX	XXX
B&B	15 in.	\$ 6.00	\$ 8.00
B&B	18 in.	9.50	11.50
B&B	2 ft.	15.00	20.00
B&B	2 1/2 ft.	19.00	24.00
B&B	3 ft.	24.00	29.00
B&B	3 1/2 ft.	30.00	36.00
B&B	4 ft.	35.00	44.00
B&B	5 ft.	60.00	80.00
B&B	6 ft.	80.00	100.00

GOVERNOR MOUTON

C. jap. Gov. Mouton

Flowers of medium size, blood-red color, sometimes spotted with white Semi-spreading habit of growth.

Class	Min. Ht.	XX	XXX
B&B	2 ft.	\$15.00	\$20.00
B&B	2 1/2 ft.	20.00	26.00
B&B	3 ft.	24.00	37.00
B&B	4 ft.	35.00	48.00
B&B	5 ft.	65.00	85.00

SPECIMENS 6 ft. up \$80.00 and up.

LADY ALICE

C. jap. Lady Alice

Dark red flowers, peony shape, late bloomer. Good grower and bloomer.

This variety highly recommended for plantings where Winter weather would injure an early flowering type. Beautiful double flowers in late Season, perfectly shaped.

Class	Min. Ht.	XX	XXX
B&B	2 1/2 ft.	\$36.00	\$49.00
B&B	3 ft.	50.00	62.00
B&B	3 1/2 ft.	62.00	71.00
B&B	4 ft.	70.00	84.00

LILY

C. jap. lily

A taller growing type, growing more compact when older. Flowers early, double snowy white with occasional marking of color, usually light pink stripe. Heavy flowering variety, excellent for cut flowers or showy on the shrub.

Class	Min. Ht.	XX	XXX
B&B	18 in.	\$ 5.50	\$ 6.80
B&B	2 ft.	6.80	9.00
B&B	2 1/2 ft.	9.00	11.00
B&B	3 ft.	11.00	15.00
B&B	4 ft.	15.00	21.00

POPE PIUS

C. jap. pope pius

(WM. HASTIE) (PURPLE DAWN) (PURPLE EMPEROR)
Very large extremely double flower with many small petals of rich crimson color. Rich dark green foliage. Blooms in early Fall.

Class	Min. Ht.	XX	XXX
B&B	3 ft.	\$37.50	\$45.00
B&B	3 1/2 ft.	45.00	52.50
B&B	4 ft.	52.50	60.00
B&B	4 1/2 ft.	60.00	72.00
B&B	5 ft.	77.50	85.00

PROFESSOR C. S. SARGENT C. jap. Prof. C. S. Sarg.

Compact grower; leaves roundish, large, thick, glossy. Flowers full double peony form, very tight in center. Dark Red. Very desirable.

Class	Min. Ht.	XX	XXX
B&B	2 1/2 ft.	\$18.00	\$24.00
B&B	3 ft.	24.00	29.00
B&B	3 1/2 ft.	29.00	35.00
B&B	4 ft.	34.00	42.00
B&B	5 ft.	42.00	55.00
B&B	6 ft.	64.00	78.00

PURITY

C. jap. purity

A Pure white, perfectly symmetrical in shape. One of the very best white flowers.

Class	Min. Ht.	XX	XXX
B&B	2 1/2 ft.	\$12.00	\$16.00
B&B	3 ft.	18.00	24.00
B&B	4 ft.	24.00	33.00
B&B	5 ft.	32.00	44.00
B&B	6 ft.	44.00	59.00

SARAH FROST

C. jap. Sarah Frost

Widely planted. Flowers very double, crimson, very free bloomer at midseason. Very thrifty grower.

Class	Min. Ht.	XX	XXX
B&B	2 ft.	\$ 7.50	\$10.00
B&B	2 1/2 ft.	10.00	13.00
B&B	3 ft.	12.00	15.00
B&B	3 1/2 ft.	15.00	18.00
B&B	4 ft.	18.00	24.00

SOPHIA

C. jap. sophia

Much like Chandleri Elegans. Flowers more cup-shaped and larger.

Class	Min. Ht.	XX	XXX
B&B	2 ft.	\$15.00	\$20.00
B&B	2 1/2 ft.	19.00	24.00
B&B	3 ft.	24.00	29.00
B&B	4 ft.	30.00	36.00

STAR WHITE

C. jap. star white

Pure white, very good bloomer.

Class	Min. Ht.	XX	XXX
B&B	2 1/2 ft.	\$ 9.00	\$11.00
B&B	3 ft.	11.00	15.00
B&B	4 ft.	15.00	21.00

SPECIMEN CAMELIAS—We are listing here only small sizes; however, we have many larger specimens in our fields priced according to size and variety. If you need Specimens, we invite you to look over our collection.

These specimens include Chandleri Elegans, Gov. Mouton, Wm. Downing, Rubra Virginialis, Opelousas Pink, Tri-color, Sarah Frost, and many others.

CHERRY LAUREL

LAUROCERASUS

CHERRY LAUREL

L. caroliniana

(Wild Peach)

(Southern Laurel)

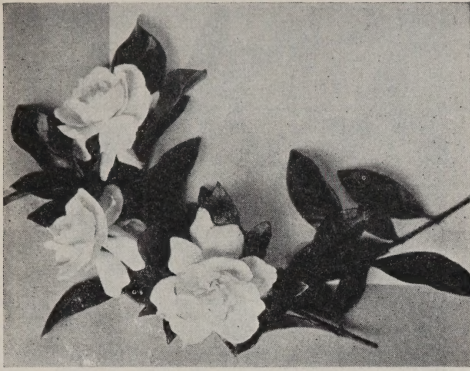

Cherry Laurel is one of the most versatile of the Broadleaf Evergreens. It may be used in the foundation planting around a building in border or group planting, for hedges, both formal and informal, and as specimens on the open lawn.

Class	Min. Ht.	XX	XXX
B&B	4 ft.	\$2.50	\$ 3.90
B&B	5 ft.	4.90	5.90
B&B	6 ft.	5.90	6.80
B&B	8 ft.	7.80	11.00

CAPE JASMINE

GARDENIA

One of the most commonly known Evergreen Flowering Shrubs in the Gardens of the South. Very popular for their fragrant, white flowers. Does not like lime or alkali soils. Prefers neutral or acid soils.

Blossoms of the Gardenia are most attractive in the Garden, as well as sweet scented.

DWARF SPREADING

Gardenia radicans prostrata nana

Spreading habit. Small, pointed leaves about one-half inch wide glossy green. Miniature Gardenia flowers, fragrant and snowy white; blooms early in the Spring and occasionally during the Summer. Grows better in full sun, but will grow in partial shade. Used for low groups and borders.

Class	Min. Sprd.	XX	XXX
B&B	18 in.	\$.95	\$1.30
B&B	24 in.	1.40	1.90
B&B	30 in.	1.90	2.60
B&B	36 in.	2.90	3.40

SEMI-DWARF

Gardenia stricta nana

Semi-spreading habit. Leaves, dark green, pointed, about two inches long. Flowers small, pure white, highly fragrant. Will not grow in lime soil. May be grown in partial shade. Fairly hardy. Valuable for low groups or foundation plantings.

Class	Min. Sprd.	XX	XXX
B&B	18 in.	\$.90	\$1.20
B&B	2 ft.	1.20	1.90
B&B	2½ ft.	1.90	2.25
B&B	3 ft.	2.50	3.25
B&B	3½ ft.	3.25	4.25
B&B	4 ft.	4.60	5.90

FLORIDA

Gardenia grandiflora

Very bushy habit. Dark green, glossy foliage. Large, white waxy scented blooms, produced early in the Spring only.

Class	Min. Ht.	XX	XXX
B&B	3 ft.	\$1.20	\$2.00
B&B	4 ft.	2.00	2.60
B&B	5 ft.	3.00	4.50

FORTUNE (Fall Blooming Type) Gardenia fortunei

Compact, bushy habit. Dark green foliage. More hardy than the Florida. Blooms are medium size waxy white, and sweet scented, appearing in the Spring, and at intervals during the Summer. This is the variety so much in demand for the Gardens of the South, as well as in the North, when given proper protection.

Class	Min. Ht.	XX	XXX
B&B	15 in.	\$.90	\$1.30
B&B	18 in.	1.30	1.75
B&B	2 ft.	1.60	2.00
B&B	2½ ft.	1.90	2.70
B&B	3 ft.	2.40	3.90
B&B	4 ft.	3.00	4.60
B&B	5 ft.	3.75	5.90

COTONEASTER

FRANCHET

Cotoneaster francheti

Semi-upright habit of growth, medium dull gray-green leaves, whiter underneath, flowers white in profuse clusters. Dull red berries. Compact habit of growth.

Class	Min. Ht.	XX	XXX
B&B	2 ft.	\$1.40	\$1.90
B&B	2½ ft.	1.90	2.40

ELAEAGNUS

No group of Broadleaf Evergreens have grown more in favor during the past few years than the Elaeagnus Family. A most versatile Shrub, for foundation plantings, groups, borders or hedges. To our knowledge, no other shrub grows better than Elaeagnus in shady locations, as well as in full sun. Small white flowers, followed by small yellowish-red edible fruit.

Note—All Elaeagnus Cutting Grown.

BROADLEAF

E. pungens macrophylla

Leaves are large and pointed, upright grower, one of the best large fast growing types to be planted in the back-ground of groups.

FRUITLAND

E. pungens fruitlandi

Very similar to Broadleaf, only it has more open weeping habit of growth.

ROSEDALE

E. Griffing Hor. var.

A new sport. Small leaves, upright growth, many small branches, where used in shade for Hedges with its new bronze leaves and brownish bark makes excellent contrast color in plantings.

SIMON

E. pungens simoni

Small dark green leaves and upright growth, and when the foliage is young, it adds attractiveness to the silvery-white coloring. Preferred by some for back-ground planting or a tall narrow hedge.

Class	Min. Ht.	XX	XXX
B&B	2 ft.	\$1.30	\$1.70
B&B	2½ ft.	1.70	2.40

B&B	5 ft.	5.40	7.00

New Compact Elaeagnus

This specimen is typical example of our field grown Cutting-grown Elaeagnus, which are so useful in general landscape plantings. Use them for shady locations as well as in full sun.

GRIFFING'S COMPACT

E. Griffing Hor. var.

New and unusual variety, a sport of the Fruitlandi discovered by us in 1934. Preferred to all other varieties of Elaeagnus by many customers and Landscape men because of its close compact, attractive growth. Semi-spreading compact habit, leaves of medium size and quantities of small branches makes it very attractive and good for clipped hedges or Specimen plants.

Class	Min. Ht.	XX	XXX
B&B	3 ft.	\$1.90	\$2.90
B&B	4 ft.	2.90	3.90

STRAWBERRY *Psidium cattleianum*

Fruit is very fine, the color, size, and flavor resembling strawberry.

		XX	
Class	Min. Ht.	XX	XXX
B&B	18 in.	\$1.25	\$1.60
B&B	24 in.	1.60	2.90

Cluster of Berries from
Wilma Firethorn.

The New Pyracantha
"Wilma."

ATLANTOIDES *Pyracantha atlantoides*

Semi-upright growing type, with clusters scarlet berries.

DUVAL *Pyracantha duvaldi*

New variety originated in California, producing fairly well in Gulf Coast section. Semi-upright habit of growth, large red berries in mid-winter season.

FORMOSA *Pyracantha formosana*

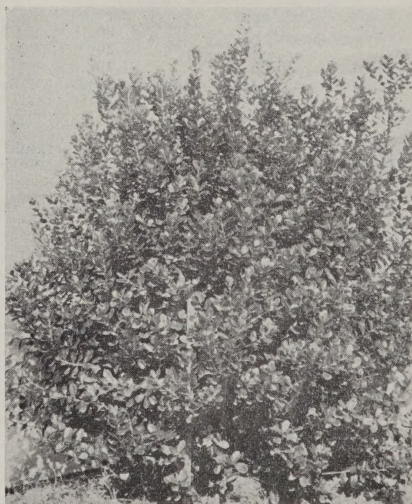

Fine, narrow leaves. Masses of brilliant red berries in Fall and Winter. More upright habit.

WILMA *Griffing's Hort. variety*

A new Firethorn we introduced two years ago that has upset all records for sales for the Landscape. It is upright in habit of growth, masses of white flowers in the Spring, and clusters of large gorgeous red berries during the Fall season. The most talked of and in greatest demand for the Landscape of any other variety known for general planting.

HOLLY - Ilex

There are many kinds of Hollies, some make Trees, others shrubs—all are valued for their berries. However, all the Trees or plants do not bear berries. Pistillate ones will bear if Staminate ones are grown close to them.

The Hollies are beautiful plants at all times, some varieties making large trees, and others small compact shrubs. Being clothed in hard, shiny, irregularly formed foliage, they hold their own among other Trees and Shrubs but in Winter, when loaded with beautiful berries, they are the glory of the garden. The Hollies are adapted to many uses—as individual specimens, in groups, foundation and border plantings, and formal clipped hedges. The Yaupons grow readily in the shade, and are not affected with heat or drought conditions.

HOLLY - Ilex

NOTICE: Both pistillate (Berry-bearing or Female) and staminate (Non-berry or Male) types. The Pistillate types will bear berries only when properly cross-pollenized by the Staminate type. There should be one staminate for every five pistillate.

AMERICAN HOLLY

Ilex opaca

Tall, pyramidal growth with horizontal branches. Large, rounded, glossy dark green leaves with spines. Bears masses of bright red berries in winter. Grows both in shady locations, and in full sun. Thrives best in sandy loam soil. This is the beautiful Holly used for holiday decorations. In addition to this, it is worthy of far more attention from Landscape Gardeners than it usually receives.

BERRY BEARING—(Pistillate - Female)

YAUPON HOLLY

Ilex vomitoria

This is undoubtedly the best of the native shrubs. It can be kept sheared resembling the fine-leaved Boxwood. Nursery grown, root pruned, balled from our Beaumont Balling Soil. Compact growth, highly improved over those grown in the woods. We have sheared some into Globes, Cones, Squares and Pyramids. We also grow blocks for Hedge Purposes and constantly headed back while small makes low compact hedges to start with. Umbrella shaped trees or compact bushy shrubs. The finest shrubs for compact hedges, sheared or unsheared. The young stems are light brown, turning to a light gray. The leaves are small, lustrous green above, and paler beneath, and cling from two to three years. The transparent red berries are very outstanding. This variety of Holly grown in all soils, and in shady locations, or in the open sun. Makes the best Evergreen Hedge. Also, useful as specimens, screens, accents in foundation plantings; in fact, anywhere in the Landscape Planting. They can be pruned to any shape or size, and with little work, look well at all seasons. Immune from all known kinds of insects and fungus diseases.

YAUPON HOLLY

YAUPON HOLLY Natural Type

BERRY BEARING (Pistillate - Female)

The natural growth types have only had the long side branches sheared when young, causing them to take a center shape with many uniform branches.

B&B	3 ft.	2.25	3.00

PITTIOSPORUM

TOBIRA

Pittosporum tobira

Dark green leaves, tiny white fragrant flowers.

WHITSPOT

P. tobira variegata

Similar to Pittosporum Tobira.

Class	Min. Sprd.	XX	XXX
B&B	15 in.	\$1.30	\$1.90
B&B	18 in.	1.90	2.90
B&B	2 ft.	2.90	3.90
B&B	2½ ft.	3.90	5.50
B&B	3 ft.	5.50	7.50

PODOCARPUS

One of our most attractive trees or shrubs. The fruit is very peculiar, as it has a blue stem with a red ball at the end. Can be planted at the water's edge without injury from salt sprays. One of the most versatile trees grown, for borders and groups, or in individual specimens.

BROADLEAF YEWE

Podocarpus macrophylla

Beautiful evergreen, upright branching shrub or small tree. Rather broad leaves, light green when young, dark green when mature.

LITTLELEAF YEWE

Podocarpus microphylla

Similar to macrophylla, except bush is more compact in form, and more slender growth; leaves are more narrow, and are green from youth to maturity.

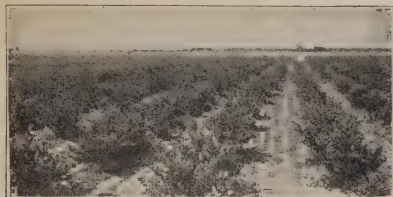

Class	Min. Ht.	XX	XXX
B&B	2 ft.	\$2.10	\$3.40
B&B	3 ft.	3.10	4.60
B&B	4 ft.	4.60	6.50
B&B	5 ft.	6.90	9.90
B&B	6 ft.	9.90	13.90

USE GRIFFING'S STANDARDIZED GRADED TREES

PRIVET

LIGUSTRUM

This is another large family with various shaped leaves, branches and color, etc. Largely used throughout the South. All varieties have masses of white flowers followed with black berries.

Field of Griffing's Waxleaf Privet

BLACKLEAF

L. lucidum nigrafolium

Distinct black-green foliage. Most hardy of the Ligustrum group; very thick and glossy shrub.

CRINKLYLEAF

L. lucidum recurvifolium

A descriptive name from its twisted or crinkly leaves. Its long arching branches with dark green foliage makes it very attractive; much harder than most of the lucidum types.

WAXLEAF, GRIFFING'S

L. lucidum compactum

This is the best bushy, compact evergreen shrub along the Gulf Coast. We have continued propagating from cuttings this variety from the original plants. Its low compact growing type is decidedly different from a lot of Waxleaf.

Class	Min. Ht. & Sprd.	XX	XXX
B&B	18 in.	\$.75	\$.90

B&B	15 in.	\$1.50	\$2.10
B&B	18 in.	2.10	2.90
B&B	2 ft.	2.90	3.90
B&B	2½ ft.	3.90	4.90

XYLOSMA-X. senticosa

New Broadleaf Evergreen; bright green foliage, the young tips having a reddish-bronze tinge.

Class	Min. Ht.	XX	XXX
B&B	4 ft.	\$4.90	\$5.90
B&B	5 ft.	5.90	6.90

CONIFEROUS EVERGREENS

Needle-leaved and cone-bearing trees, including many varieties, among which are the Arborvitae, Cypressess, Cedars, Junipers and Pines. Conifers when properly placed add more distinction as well as age and beauty to a planting. Their growth is so slow that they never outgrow their places. The lower limbs of Conifers should always be allowed to remain, for in removing them, the natural beauty is destroyed.

ARBORVITAE

THUJA ORIENTALIS

There are two types of Arborvitae, which are known as Occidental and Oriental. The Orientalis are generally not suited for the Southern States, while the Orientalis or Chinese types all do well in the South. The Oriental type is also classed as "Biota," which is now unapproved.

Nursery field of Excelsior Arborvitae.

EXCELSIOR

Symmetrical. Pyramidal habit, dark green color.

Class	Min. Ht.	XX	XXX
B&B	2½ ft.	\$1.40	\$2.00

WINTERGREEN

T. or. Griffing's New Hort. variety

More compact growing, cone type, very dark green color.

Class	Min. Ht.	XX	XXX
B&B	4 ft.	\$1.50	\$2.20
B&B	5 ft.	2.40	3.90

JUNIPERS

JUNIPERUS

This is a large family. It covers the group of Conifers. From these you can get most any color, shape and size tree or shrub you need.

CANNART REDCEDAR

J. virginiana cannarti

Finest block of Cannart in the South, grafted on the Southern Type Redcedar understock. Pyramidal habit, broad at base, tapering to slender top. Irregularly branched in natural growth, with dark green cedar-like foliage. Withstands all weather conditions. The dark green tufted foliage gives a twisted effect that makes it distinctive from the cedar family. Cannarts are used in the finest gardens.

Class	Min. Ht.	XX	XXX

OAKS-Quercus

Nursery grown Live Oak Trees live and thrive under all conditions when the Trees have been root-pruned and properly Balled from the right kind of balling soil and pruned properly as they are dug.

Live Oaks are rapidly becoming the most popular Shade Tree in the South, because they are evergreen, and because they make such a shapely tree for any purpose they may be used. Our Spanish type of Live Oaks are the fastest growing variety but even then it takes Several years for a small tree to grow large enough to give shade. There is nothing more beautiful than the true "Spanish" Live Oak. This type has thick dark green, oblong, pointed leaves that glisten in the sunlight, the under side being a grayish-green color.

OAKS-Quercus

Our Live Oaks have been regularly root pruned, and grown in our black heavy Beaumont Balling Soil, they have a compact root system, which makes the transplanting of them more expensive but much more successful than forest-grown trees.

Experimental reports have been made by Experiment stations after several years of study on suitability of soils for growing Live Oak trees. The tests show that they will grow on any kind of soil equally as well as on another, whereas deciduous Oaks can only be grown on sour soil.

Fast Growing Evergreen Spanish Live Oak

LIVE OAK (Spanish Type) Quercus virginiana

We have the complete stock from Acorns gathered in Florida from the choicest isolated groves in existence, so there is not a chance of hybridizing. This true type of fast-growing Oaks are destined to revise the idea that Live Oaks are a slow growing tree, much different from the ordinary native Live Oak in Louisiana and Texas, which we call the Scrub Live Oak, but takes too long to grow. Always clean, rich foliage. Very straight bodies. From young seedlings we trim to single stem in center, not allowing forks even on our 20 foot trees. In centuries to come these forked trees may split open and ruin the tree.

Class	Caliper	Apx. Ht.	XX	XXX
B&B	1 in.	6 ft.	\$ 3.00	\$ 4.00
B&B	1 1/4 in.	7 ft.	4.00	5.00

PLANT LARGE TREES. Live Oaks dug B&B from our soil live and grow off quickly for immediate shade.

THREE TRUCK LOADS OF LIVE OAKS ENROUTE TO SAME PLANTING!

These trucks are loaded to go forward with large B&B Live Oaks, (Spanish type) for special customer who wanted immediate results. Trees planted in Fall 1941 have good shade Summer of 1942, and as they grow older they will grow more beautiful and useful in the lawn plantings.

NATIVE TYPE LIVE OAK

Q. virginiana

Nursery grown and root pruned, but slow growing native type, more irregular in shape of growth.

B&B	1 1/2 in.	7 ft.	\$2.40	\$2.90
B&B	2 in.	8 ft.	2.90	3.90
B&B	2 1/2 in.	9 ft.	3.90	4.90
B&B	3 in.	10 ft.	5.90	7.80
B&B	3 1/2 in.	11 ft.	7.80	9.60

Our Oaks are given careful attention, all forks being cut off, with the center stem retained, forcing all branches to come out horizontally from the main trunk. With this training, the center stem continues to grow upward, and the horizontal branches form a beautiful tree.

PIN OAK

Quercus palustris

Symmetrical tree with large forked leaves fading to scarlet in Fall. This is the true Pin Oak grown throughout the Northern States. Pin Oak with small leaves.

RED OAK

Quercus rubra

Large leaf, deciduous, however turns brilliant scarlet in Fall before shedding.

WATER OAK

Quercus nigra

Partly evergreen, upright branches. Leaves 2 1/2 in. wide—narrow at base.

WILLOW OAK

Quercus phellos

Upright uniform, weeping heads. Willow shaped leaves.

CITRUS FRUITS

Satsuma Oranges, Round Oranges, Grapefruit, Lemons and Kumquats produce very delicious fruits, and can be grown with ease in the back yard. They should be planted throughout the Coast region of Louisiana and Texas.

For the black waxy soils and stiff clay or flatwoods lands of Texas and Louisiana, Citrus should be budded on the Citrus Trifoliata understock.

KUMQUAT**KUMQUAT MEIWA****Fortunella japonica**

A sweet-skin Orange, orange-like blossoms and best of all Kumquats. Bank dirt well up above the buds, and should the tops freeze, they will fruit the first season.

Class	Min. Ht.	XX	XXX
B&B	18 in.	\$1.40	\$1.90

FRUIT AND ORCHARD TREES

FRUITS FROM YOUR OWN BACK YARD

FOR THE GULF COAST AREA

While the South is usually regarded as the home of Citrus, Pecans, and Fig Trees, there are other varieties of Fruits that can be grown successfully along the Gulf Coast of Texas and Louisiana, such as Pears, Grapes, Guavas, and Berries.

The Fruits we list are varieties that have been tried out and will succeed under proper selection and preparation of soil and cultural directions.

Our fifty years' experience teaches us that we cannot grow the same varieties of Peaches, Pears, Plums, and Pecans that thrive and do well in higher altitudes and different kinds of soils, even a hundred miles back from the Coast.

FIGS

Ficus

No fruit is more valuable in the Southern Fruit Garden than Figs. No home pantry is complete without CANNED AND PRESERVED FIGS for winter use. Figs come into BEARING VERY EARLY. If regularly sprayed with BORDEAUX MIXTURE they will hold their FOLIAGE LATE in the season, greatly extending the PRODUCING PERIOD.

Fresh Figs are delicious for home use or as preserved. CELESTIAL "Little Sugar Fig" *Ficus species*

The Tree is a vigorous grower and prolific bearer. The fruit is medium to small, of bluish to ivory color; flesh is rich, tender and very sweet. So tender you can eat, can, or preserve them without peeling. It is the **hardest** variety we have—hence reliable further north. Produces more fruit than any other variety. Generally considered the **business fig** of the South. Should be grown in tree form. **MAGNOLIA** *Ficus species*

This variety should be trimmed to bush form, as it bears on new vigorous limbs. It should be cut back every spring before budding out, to 5 or 6 buds of where it was cut the year before. It can be grown as far north as Oklahoma City by banking high every winter, and removing the dirt in the spring, pruning heavily, to get a quantity of new growth (every leaf should produce a fig), and by spraying to keep the leaves on, the fruit is medium to large, oblong in shape, smooth skin; color, pale yellow with purplish-brown flesh; pulp, dark red. This variety is most often used for commercial orchards for preserving purposes.

Class	Min. Ht.	Each	Per Doz.
NB	12 in.	Small \$.50	\$ 5.00
NB	18 in.	Medium .75	7.50
NB	24 in.	Large 1.00	10.00

GRAPES

Vitis

The soil for Grapes should be of deep sandy nature and it should be THOROUGHLY DRAINED. It should be DEEPLY WORKED and well manured. Every home in the South should have a shade ARBOR or nice TRELLIS of grapes.

CARMAN

Vigorous grower and prolific bearer. Fruit grows in large bunches of medium size grapes. Color, black; firm, tender, and extra fine quality. Very rich, superior flavor, seeds easily leaving pulp. A popular standard commercial variety. Ripens about July 15th.

CONCORD

Good grower; full bunches. Very large, round, bluish-black. Sweet. Ripens about July 15th. An old favorite.

NIAGRA

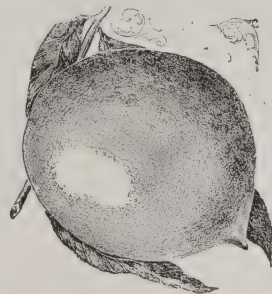

Best white bunch grape. Pale greenish-yellow in color. Tender, juicy and sweet. Fine for table use. Ripens about August 1st.

Size	Class	Each	Per Doz.
Small Vines, 1 Yr.	NB	\$.30	\$3.00
Extra Strong Vines, 2 Yr.	NB	.50	5.00

PEACHES

Amagdyalis persica

It is advisable to plant a few new TREES EVERY YEAR on well-drained soil, and NEW VIRGIN LAND. if possible, for a continuous home supply. Peaches should be well cultivated, fertilized with NITROGEN WHEN YOUNG, AND POTASH WHEN BEARING. They should be SPRAYED REGULARLY. The varieties we list have been chosen for the Gulf Coast Territory.

CARMEN

Freestone. Large white flesh with red cheek.

ELBERTA

Freestone. Large, oblong, pointed fruit. Yellow flesh and skin with red cheek. Ripens last of July and early August.

FRANK

Freestone. Large size, yellow skin with red cheek; flesh yellow, juicy and of good flavor. Ripens in July.

HOBBSON CLING

Fruit large, white and red, of best flavor. Sure heavy bearer, with firm meat.

LUTICHAU

A fine market and table peach. Large, greenish-white, marked with red. Juicy and fine flavored. Freestone. Ripens early in June.

PALLAS

Prolific and regular bearer. Flesh is white, washed with red. Medium size, oblong shape, decidedly pointed. Very sweet. Freestone. Ripens early in July.

RED INDIAN CLING

Fruit medium size, deep red color. Ripens in July. The well-known Indian peach.

Class	Min. Ht.	Each	Per Doz.
NB	3 ft.	1 Yr. \$.35	\$ 7.50
NB	5 ft.	2 Yr. 1.25	12.50

PLUMS

Prunus

Varieties of Plums suited to the Coastal Section are becoming more widely planted. Recent crops of Plums have shown the people of South Texas and Louisiana that there is no better section for their extensive production.

BRUCE

A very productive hybrid, originated by Mr. A. L. Bruce. Extra large, red fruit, delicious in flavor. Ripens early in June.

GOLD

A prolific bearer. Fruit is of medium size, firm yellow, with a little red. Ripens middle of July.

METHLEY

A very large plum, with greenish-red skin. Red flesh. Deliciously sweet. Best of the early plums. Ripens middle of May.

SANTA ROSA

Large; rich color of red. Ripens middle of June.

Class	Min. Ht.	Each	Per Doz.
NB	3 ft.	1 Yr. \$.75	\$ 7.50
NB	5 ft.	2 Yr. 1.25	12.50

STANDARD QUALITY IS XX — SPECIMENS ARE XXX

FRESH FRUITS FOR THE HOME

PERSIMMONS

Diospyrus

Where the Persimmon is known on the market it finds ready sale. The cost of cultivation, care and production, is reduced to a minimum. The trees thrive on almost any soil.

TANE NASHI

Tree long-lived. Begins bearing young, very prolific. Skin is light yellow as well as the flesh and fine quality. Large, roundish-conical in shape.

YEMON

Large tomato shaped, fruit somewhat four-sided, bears heavy and quite ornamental on the tree.

ZENGI

Fruit medium size, dark meat, eatable when hard. Long life variety, and heavy bearing tree.

Class	Height	Each	Per Doz.
NB	3 ft.	\$ 30	\$ 3.00
NB	5 ft.	1.50	16.00

PEARS

Pyrus

After the second year, Pears should not be cultivated, but the GROUND ALLOWED TO BECOME HARD. They should not be fertilized with NITROGEN, but with POTASH fertilizer only.

In order to have the fruit good to eat fresh, it should be GATHERED GREEN, several weeks before the ripening period. When gathering, care should be taken AGAINST BRUISING. Each pear should be wrapped separately and placed on shelves in a warm even temperature. As they soften, they are juicy and delicious, and will keep this way for several months.

GARBER

Tree is a rapid grower and prolific bearer. Branches upright. Fruit is large rounded shape, smooth skin, ripening about August 15th.

KEIFFER

Tree is a vigorous grower, making a well shaped, upright top. Fruit is large to very large; skin, yellow with light vermilion check. Flesh is brittle, very juicy. Fruit does not ripen on the tree until October or November.

DOUGLAS

A New Pear. Tree is a vigorous grower, with upright branches. Large glossy leaves. Fruit is large, slightly oblong in shape, creamy white with red checks. Ripens in August. A very heavy producer, and one of the best.

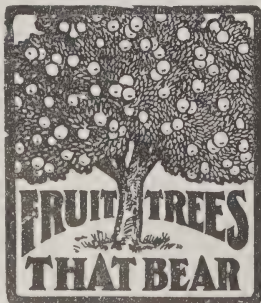

Class	Height	Each	Per Doz.
NB	3 ft.	\$.90	\$ 9.00
NB	5 ft.	1.50	15.00
NB	8 ft.	2.00	20.00

WAR TIME ORCHARD

A sure, safe and substantial income for the young or middle-aged man or woman can be more quickly established in pecan growing than any other business in which they may engage.

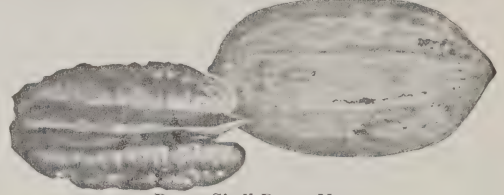

No. of Trees to the Acre

Distance apart	No. of Trees
1 x 1 feet	43,560
4 x 4 feet	2,722
8 x 8 feet	680
10 x 10 feet	435
12 x 12 feet	302
15 x 15 feet	196
18 x 18 feet	134
20 x 20 feet	108
30 x 30 feet	45
40 x 40 feet	27
50 x 50 feet	18
60 x 60 feet	12

PECANS

There are pecans and PECANS! The Paper Shell Pecans are THE PECANS! They are the ones that should BE PLANTED, for they are just as productive as the thick-shell varieties, but bring higher prices. The industry is no longer speculative nor experimental, FOR THE OLD PLANTERS the reliable nurserymen, and the state experiment stations have made careful investigations, learning which types of soil are the most suitable, the best methods of propagation, and which varieties give the BEST RETURNS. All of these facts are available to the novice who is considering THE PLANTING of a pecan orchard.

Paper Shell Pecan Nut

Notwithstanding the fact that Pecan Orchards have been planted heavily throughout the South for a number of years, and there are MANY THOUSANDS OF ACRES now bearing, the outlook is even brighter at present than AT ANY TIME heretofore. Those who engaged in the industry in the early days are reaping rich rewards.

CULTIVATE WELL AND GET RESULTS

We cannot too firmly advocate cultivation of nut trees. If you want the best results, it is imperative that you fertilize, spray, and cultivate your trees well and give them excellent care and attention. Without this proper attention, it is impossible to expect good results.

Time of Bearing

The time of bearing depends upon the care given and the method of fertilizing. It is better to have the tree make a good, sturdy growth and attain fair size before it bears; then the method of care should be changed so as to produce short twigs upon which the nut clusters are borne. This can be done by decreasing the amount of nitrogen and adding potash.

BIG "Z"

Strong, upright grower, making a rounded head. The pick of all varieties for the lower central section. The Big "Z" bears twice as many nuts as any of the old standard varieties in the same grove. It is the only large nut we have observed which bears regularly. The size averages 38 to 40 to the pound. Shell is thin, partitions thin, appearance fine, kernel rich, yellow. Very early and prolific bearer.

STUART

Tree is decidedly strong, upright grower. Nuts are medium to large. Planted more generally than any other variety. Very hardy.

SUCCESS

Tree is sturdy, vigorous grower, making a broad, full head. Nuts are large, almost round, some larger at the stem end. Shell is of average thickness. Fills well and of good quality. Successful over a wide area.

Class	Height	Each	Per Doz.
NB	4 ft.	\$2.00	\$20.00
NB	6 ft.	4.00	40.00
NB	8 ft.	6.00	60.00

Larger Trees Quoted Upon Request.

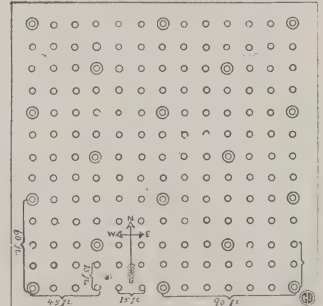

ORCHARD PLANTING

The land that will produce the best farm crops will also produce the best orchards. Rolling, well drained lands are best for all varieties of fruits.

No home, large or small is complete without an assortment of Fruit Trees. We are giving our suggestions for the arrangement of an orchard planting to give the greatest number of Trees in a small acreage.

A few fruit Trees, properly selected, planted and well cared for, will produce enough fruit for the average family, with some to sell.

O Pecan—Diagonally planted, 45 to 90 ft.
Peach, Plum, Orange, Fig, Kumquat, Interplanted 15 ft. squares.

DECIDUOUS SHRUBS

The greatest majority of brilliant flowering shrubs and other ornamental varieties lose their foliage in winter (Deciduous). For gorgeous color displays they should be promiscuously used in landscape plantings. Their winter barren period is brief in our Southern section and the color changes in autumn make the absence of leaves in winter less lamented. Usually flowering shrubs are best planted in groups of from 3 to 20 or more. They are far more effective in this way than planted singly. Put enough of one kind to make a little picture in the landscape when in bloom or when the leaves take on the autumn color, or the fruit and berries have ripened. With enough evergreens to keep the planting cheerful in winter, Deciduous shrubs should be generously used in the South.

Pruning should be done immediately after blooming season, cutting the fading blossoms away. Pruning too late or when dormant will sometimes interfere with blooming the following season.

Flowering shrubs can be handled when dormant with bare roots. Better results are usually had with B&B plants. For early or late planting and even mid-summer plantings, B&B shrubs will grow luxuriantly. Try them and see what excellent results you obtain.

CRAPE MYRTLE

LAGERSTROEMIA INDICA

We grow most of ours in Balling soil—it pays to ball them. Write on order if single stem, many stems from ground or if bushy plants are wanted.

BALLED and BURLAPED CRAPE MYRTLES transplant with unusual success from our Balling soil, to live, grow, and blossom heavy the first season. Why not give immediate effects his way? With the wide variety of colors to select from, they can be used extensively in the Landscape. B&B Crape Myrtle transplant into cold climates with success, whereas bare-rooted plants winter kill.

The favorite Flowering Shrub of the South. A hardy and heavy bloomer; it paints the landscape in the summer months with its brilliant blossoms in tones of crimson, red, pink, purple, and other shades. Frequently termed the "Lilac of the South." Inter-planted with evergreens, beautiful effects are obtained. Massed in groups of any size, a display of color unrivaled is had the first summer. The most generous usage and the demand of recent years indicates its great popularity.

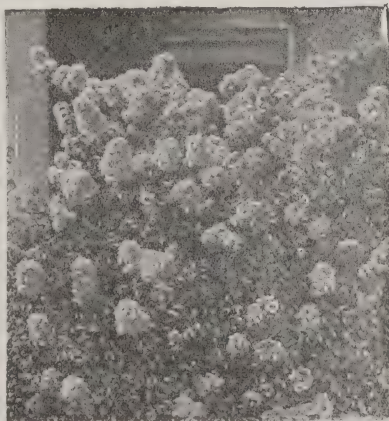

CRAPE MYRTLE

DWARF BLUE *L. i. corrulea nana*
Low spreading, lavender-blue flowers in loose panicles which almost cover the plant.

PLANT MORE CRAPE MYRTLES FOR FLOWERS!
With a large selection of colors, they are beautiful in flower all Summer. As they thrive so well in the South we recommend greater plantings of all Crape Myrtles.

PRUNE EVERY WINTER—For best results Crape Myrtles should be cut back to one foot of the ground when planted. (By using big sizes you get better root systems.) Then every year thereafter prune them back to within 2 to 4 inches where they were the year before. In this way you get much larger flowers, thick branches, and dense foliage.

CRAPE MYRTLE (Cont.)

IMPERIAL PINK

Large heads, pastel pink flowers.

L. i. rosea

LAVENDER

A bright shade, very attractive and highly desirable. Large fluffy flower heads.

THRYALLIS

(YELLOW PLUMBAGO)

Low compact growth, rich green leaf, clusters of yellow flowers in late fall.

Class	Apex. Ht.	XX	XXX
B&B	2 ft.	\$1.50	\$1.90
B&B	2½ ft.	1.90	2.40
B&B	3 ft.	2.40	2.90

GRIFFING'S QUALITY ROSES

For the convenience of our Wholesale Trade who call on us for best selection of Roses along with their entire requirements of Trees and Shrubbery, we list this selection of roses to accomodate their orders and furnish them with a full choice selection.

ROSES

We have two varieties to take the place of Everblooming Flowering Shrubs, for Hedges, or in low groups.

AZALEA ROSE

Flowers much larger than the usual Baby Roses. Clusters large on good strong stems, growing about 2 ft. high. A free and vigorous grower and abundant bloomer. Color, a bright rose pink.

LOUIS PHILIPPE ROSE

The foliage is always bright and green. The bush is a very strong grower of bushy habit and with bright red flowers, hanging in clusters over the bush at all seasons of the year, it is one of the best flowering shrubs that can be planted.

Class	Apex. Size	Age	XX	XXX
B&B	No. 1½	—2 yr.	\$1.00	\$1.50
B&B	No. 1	—3 yr.	1.50	2.00

Less for NB—Deduct 50% from above prices.

GRIFFING'S SELECTED ROSES FOR THE GULF COAST AREA

Our long experience has shown us that many varieties have their merits. Many customers use our Roses because they know we have tested and offer only the best varieties.

RED SHADE OF COLOR

Red Radiance	Clear Red
Etoile de Holland	Deep Bright Red
E. G. Hill	Dazzling Scarlet

PALMS

Nothing makes our Southern towns more invitingly tropical, especially in the eyes of our Northern visitors, than the Palms, at home in our mild climate. Lofty palms lining an avenue suggest stability and dignity. A careless grouping of palms with other evergreens makes for an effect of luxuriance than nothing else can create.

Every home can have a few Palms. They enhance property value and are the greatest asset in beautifying. On small grounds, they will thrive where other trees will not, because their root systems do not require much space.

Sabal Palm—Hardest Variety

BLACKBURN PALMETTO Palm Sabal Blackburniana

Fan-shaped leaves, brown trunk; hardiest of all Palms, can stand almost zero temperature.

Class	Caliper	Min. Ht.	XX	XXX
B&B	2 ft.	\$ 1.60	\$ 1.90
B&B	3 ft.	1.90	2.60
B&B	6 ft.	8.90	10.90
B&B	8 ft.	11.80	14.90
B&B	10 ft.	16.80	21.90
B&B	12 ft.	22.90	33.80
B&B	14 ft.	34.90	44.90

NOTE: If a trunk is desired, add \$1.50 per foot above 4 ft.

Palms Used in the Landscape of Southern Estates

PALMS FOR
TROPICAL
BEAUTY

CANARY DATE

The Canariensis is the noblest of all the Phoenix family, being one of the most majestic Palms in cultivation. Its long graceful, swaying leaves often attain a length of from 10 to 15 feet.

Class	Caliper	Min. Ht.	XX	XXX
B&B	3 in.	18 in.	\$1.70	\$2.20
B&B	4 in.	2 ft.	2.20	2.90
B&B	5 in.	3 ft.	2.90	3.90

FRUITING DATE PALM

An attractive Date Palm with long arching, gray-green leaves. One of the best of the Date varieties.

Class	Caliper	Min. Ht.	XX	XXX
B&B	3 in.	2 ft.	\$1.70	\$2.20
B&B	4 in.	3 ft.	2.20	2.90
B&B	5 in.	4 ft.	2.90	3.90

LATANIA

Low growing fan-leaf variety, rich dark green, for outside plantings along the Gulf Coast most effective.

Class	Min. Ht.	No. of Leaves	XX	XXX
B&B	10 in.	4 to 6	\$1.50	\$1.90
B&B	14 in.	6 to 10	1.90	2.50

Pindo Palm—Cocos australis

PINDO PALM

Cocconut Palm growth. Edible Fruit similar to Date Palm only smaller. Its long drooping Palm shaped leaves of a blue-green color are very attractive and can be planted very extensively along our Gulf Coast territory as it is very hardy and will stand the ordinary cold weather for 100 or more miles from the Gulf Coast.

Class	Caliper	Min. Ht.	XX	XXX
B&B	5 in.	2 ft.	\$2.80	\$ 3.60
B&B	8 in.	3 ft.	5.80	6.90

B&B	2 ft.	8 ft.	5.40	7.00

Note--NB at 25% less than B&B.

Pampas Grass

Bamboo

GRASSES--ORNAMENTAL

PAMPAS GRASS *Cortaderia argentea*

Beautiful light green foliage, gracefully recurved. In the summer, this Grass sends up tall, silvery plumes $2\frac{1}{2}$ ft. long, and 1 ft. wide, which are very distinctive and beautiful in both form and color.

PINK PAMPAS GRASS *Cortaderia argentea*

Beautiful light green foliage, gracefully recurved. Sends up tall plumes in summer, which have a pinkish hue, and very attractive.

STRIPED EULALIA *Miscanthus sinensis variegatus*

Attractive light green foliage, with decided white pin stripes lengthwise of the blades. Slender white plumes.

ZEBRA GRASS *Miscanthus sinensis zebrinus*

The foliage is light green with white stripes crosswise of the blades. Small, slender white plumes.

	XX	XXX
B&B 12 in. Tops cut	\$1.10	\$1.80
B&B 18 in. Tops cut	1.80	2.90
B&B 2 ft. Tops cut	3.20	5.90
B&B 3 ft. Tops cut	5.90	7.80

Note--NB at 25% less than B&B.

GRASS--LAWN

ST. AUGUSTINE GRASS *Axonopus compressus*

This new Grass fills a long-felt need for a ground cover under shade tree and a permanent green lawn. This type does not grow from seed. Must be planted from sod. With proper care, a fine lawn can be had in a short time.

Sod Cut in 1 foot squares

	Del. in Blk.	Pkd. for Shp.
1 to 10 yards at.....	\$1.50	\$1.90

Flowers are white or purple.

Class	Min. Ht.	XX	XXX
B&B	2 ft.	\$2.90	\$3.90
B&B	3 ft.	3.90	4.90
B&B	4 ft.	4.90	5.90

Bamboo Makes Nice Specimen on the Lawn or Very Effective for Screenings.

VINES-All Kinds Listed Here

A Vine covered pergola makes a worthwhile addition to any garden. A careful study of your grounds will show immediately where Vines can be used to achieve beautiful effects. Be sure to make the right selection for the spot, as some vines and creepers will thrive better than others, and color harmony is an important feature.

Do not allow your vines to cover entirely a well designed doorway or window. Let them frame the good features of the house and cover its architectural defects. Training or trimming should be shrewdly done to keep the naturalistic effect, which vines give to a house planting.

FIG VINE-Ficus pumila

(FICUS REPENS)

Small oval heart shape leaves, clings to brick and masonry.

Class	Size Pots	No. Runners	XX	XXX
From 2 1/4 inch pots		3-5	\$.50	\$.80
From 3 inch pots		5-8	.80	1.20
From 4 inch pots		8-12	1.20	1.70

BEAUTIFY HOME GROUNDS NOW

PLANT TREES AND SHRUBS

There is no time like the present to develop and improve the home grounds. A few Trees and Shrubs, flowering and fruiting types, planted over the grounds adds to the real beauty of the grounds and value to the property. This book contains the very best selections for the entire Southwest area—tried and proven varieties that are sure to give results.

With curtailed travel, take more pride in the home grounds and improve or remodel the landscape planting. It will be a pleasure to plant these new shrubs, and will add more pleasure to the enjoyment of your home grounds.

HOME SLOGAN OF THE TIMES

No Home is complete without the planting of the grounds. Whether a modest cottage, a large pretentious mansion, the farm home, the apartment or the smallest home, there is always a space for growing trees, vines, shrubbery, roses and fruit trees. There is a real joy in planting these items in the home grounds, as in time they reap returns most enjoyable to the whole family. Plant your home grounds and orchard today, for the harvest tomorrow.

HIGHEST QUALITY FOR RESULTS

Since 1886 when we first began to grow and offer selections of Shrubby, Shade Trees and Fruits to the public, we have tried continuously to produce and offer the highest quality selections of quality and varieties we could. Based on this practice of doing business, we have built our business on the foundation of "High Quality and Good Stock," and satisfied customers.

We take pride in serving our customers by furnishing high quality, true to variety, and good hardy field grown stock that we know will give results when transplanted and given a reasonable amount of care and attention. Today it is a real pleasure to point out the Home Grounds and Orchards throughout the Southwest, where our selections of Trees and Shrubby has played such an important part in their development.
